

LIFESAVER

A SMART CPR GUIDANCE

AT CARDIAC ARREST QUICK INTERVENTION SAVES LIVES. THE GROWING NUMBER OF AED'S IN PUBLIC SPACE HAS INCREASED THE SURVIVAL RATE. HOWEVER, THIS RATE COULD BE EVEN HIGHER IF MORE PEOPLE WOULD FEEL CONFIDENT TO PERFORM CARDIOPULMONARY RESUSCITATION AND IF THE QUALITY OF CHEST COMPRESSIONS WOULD IMPROVE. LIFESAVER CAN HELP TO ACHIEVE THIS!

FUTURE MATERIALS

- Smart and intuitive guidance of CPR
- Correct electrode placement
- Right location for chest compressions
- Measures compression depth and gives feedback
- Coaches by indicating the right rhythm
- The concept focusses on creating an unambiguous UI by using LTM material
